

BiOWiSH® Crop

Organic Soluble Solid Microbial Biostimulant

Mode of Action

The key to BiOWiSH®'s effectiveness is a cycle of positive shifts in the soil microbiome and endophytic activity in roots.

Method of Application

BiOWiSH® Crop is a solid, soluble microbial biostimulant for mixing on-farm and applying by liquid delivery systems. No activation required!

Performance Across Broad Operating Conditions

- pH 3.5 to 9.5
- Salinity up to 35,000 ppm
- Low oxygen content
- Below wilting point
- Oligotrophic (low nutrient) conditions
- Across a broad range of organic materials
- Starting at 50° F soil temperatures

BiOWiSH Technologies offers an organic biostimulant with consistent results across a broad range of operating conditions and environments, all at a low cost to farmers.

- Improves crop yields
- Increases nutrient availability
- Enhances root development
- Improves plant vigor
- Stimulates native microbial activity in the soil
- Improves soil health

Crops that Benefit from BiOWiSH®

BiOWiSH® Crop is recommended for all crop types. Contact a BiOWiSH representative or certified agronomist for your personalized recommendations.
