

BiOWiSH™ MultiBio 3PS

All natural Direct-Fed Microbial (DFM) For Aquaculture and On-Farm Livestock Applications

Benefits

- Highly efficient and fast acting
- Effective for all animal types
- Cost-effective and its performance for the end-user yields a leading return on investment

Animal Types

- Ruminants (Cattle, Goats, Sheep, and more)
- Monogastric (Swine, Poultry, and more)
- Aquaculture (Shrimp, FinFish, and more)

Product Applications

- **Ruminant** - Liquid Feed, Mash Feed, Total Mixed Rations
- **Monogastric** - Drinking Water, Mash Feed
- **Aquaculture** - Post-Pelleting Liquid Application
- **Aquaculture hatchery and maturation tanks** - Water Addition

Available Sizes

- 2.2lbs /1kg
- 11lbs /5kg
- 22lbs /10kg
- 55lbs /25kg

About BiOWiSH™ MultiBio 3PS

BiOWiSH™ MultiBio 3PS is a DFM for all animal species, including ruminants, poultry, swine, finfish, and shrimp. It is a recommended feed additive for all growth stages.

BiOWiSH™ MultiBio 3PS is water-soluble ensuring easy dispersion into liquid feeds and drinking water as well as incorporation into mash, TMR, or bunk rations and other compound feeds.

Maintain recommended concentration by adding more BiOWiSH™ MultiBio 3PS through the approved application process on a daily basis.

Our robust products are designed to be simple to apply within current management practices and delivery systems already being used in the animal production industry. BiOWiSH™ products provide a level of performance and sustainability unmatched in value for our customers.

BiOWiSH™ MultiBio 3P

All natural Direct-Fed Microbial (DFM) for Pellet and Extruded Feed Manufacturing

Please contact us for Research Studies and other product information.

Animal Types

- Ruminants (Cattle, Goats, Sheep, and more)
- Monogastric (Swine, Poultry, and more)
- Aquaculture* (Shrimp, FinFish, and more)

* Please ask us about time and temperature exposure limits.

Available Sizes

- 2.2lbs /1kg
- 11lbs /5kg
- 22lbs /10kg
- 55lbs /25kg

Feed Compatibility

BiOWiSH™ MultiBio 3P is formulated as a micro addition in all animal feed types for feed mill pelleting or extrusion processes that do not exceed 95°C for 25 minutes.

About BiOWiSH™ MultiBio 3P

BiOWiSH™ MultiBio 3P is a DFM for all animal species, including ruminant, monogastric, and select aquaculture. BiOWiSH™ MultiBio 3P is a recommended feed additive for all growth stages.

BiOWiSH™ MultiBio 3P can be added to the animal feed manufacturing pelleting or extrusion process. Simply dry add-mix the recommended amount of BiOWiSH™ MultiBio 3P as a dry concentrate to the pelleting process using typical methods for delivery of low-inclusion, non-liquid admixtures. See user guides at biowishtech.com for detailed application instructions.

For optimum results commence feeding at the earliest possible animal life stage. Maintain the recommended dose by adding more BiOWiSH™ MultiBio 3P with each animal feed addition.
