

BiOWiSH™ AquaFarm

Raceways

BiOWiSH™ AquaFarm can improve growth rates and survival rates in raceway systems through improvements in water quality.

Dosing Rates

- Every 3 days: Measure 1 gram of BiOWiSH™ AquaFarm per metric ton (1,000 liters) of water to be dosed.
- Mix BiOWiSH™ AquaFarm into raceway water using a minimum of 4 liters of water per 100g of BiOWiSH™ AquaFarm for delivery. Dose into raceway to achieve good distribution.

Dosage can be increased to accommodate higher biomass loading or as required.
