

Banana Wash Open Systems

General Recommendations

- 1. Thoroughly clean all application equipment prior to use.
- 2. Add BiOWiSH™ Fruit and Vegetable Wash to a dosing container with a feed to the wash tank at a rate of 1ppm (1mg/L) for all water volume during production hours.
 - For every 100g (3.5oz) of BiOWiSH™ Fruit & Vegetable Wash recommended, use a minimum of 20L (4gal) of water in a dosing container. No activation required!
 - Feed from dosing container to wash tank can be via an electric injection pump or
 - For best product distribution connect the feed line to wash tank water spray lines.
 - Mechanical aeration in the dosing container is not required. Please allow headspace or exposure to air.
 - Maintain recommended concentration by adding more BiOWiSH™ with each water replacement.
 - Example: For each 100m³ (26,400gal) of water used to start the production day and replaced in the wash tank, add 100g (3.5oz) of BiOWiSH™ daily.
- A "shock dose" of 100g (3.5oz) of BiOWiSH™ Fruit & Vegetable Wash for each 100m³ of water in the wash tank is recommended after each tank cleaning and may be added directly to the clean wash tank.
- 4. BiOWiSH™ Fruit & Vegetable Wash is compatible with many other products.
 - Most systems maintain 1.0ppm of chlorine or 5.0ppm of peroxide (H₂O₂).
 - Facilities that use coagulants as part of their management practice can reduce the amount of coagulant when adding BiOWiSH™ to their operation.
 - Always read and follow label directions of tank mix products.
- 5. For best results, maintain a wash water pH above 5.5.
- 6. Review water replacement schedule following initial period of BiOWiSH™ Fruit and Vegetable Wash use.
- 7. For site specific or other application questions, please contact a BiOWiSH™ products distributor near you or contact technical support at foodtech@biowishtech.com.

Store in cool, dry location out of direct sunlight. Once opened, keep dry in an airtight container to prevent activation. Once in solution, apply or dose mixture within 24 hours.

Step 1: Clean Dose Tank

Step 5: Delivery

Step 2: Add BiOWiSH™

Step 6: Wash Tank

Step 3: Feed Line

Step 7: Adjust chemicals

BiOWiSH™ Fruit & Vegetable Wash

- Increase storage life to maintain freshness
- Resolve latex issue
- Reduce harmful chemicals used for washing
- Reduce odor from wash water
- Improve wash water quality
- Improve discharge water quality
- Reduce water and energy
- Simplify cleaning and reduce man-hours

Available Sizes

- 3.5oz/100g
- 2.2lb/1kg

Made in USA

Step 4: Feed Equipment

Step 8: Water Schedule
