

BiOWiSH™ GUARD'n SHIELD

Banana Production Pre-Harvest Biocontrol

BiOWiSH™ GUARD'n SHIELD is an all-natural, organic product for use in pre-harvest control of phytopathogens for banana and other crops.

BiOWiSH™ GUARD'n SHIELD

- Helps control common banana and other plant diseases
- Is compatible and works in combination with common chemical fungicides. For information on compatibility with specific fungicides please contact your local BiOWiSH distributor or email foodtech@biowishtech.com.
- Allows reduction in the total amount of chemical fungicide use for plant disease control.

Banana Production General Recommendations

Shake well before using. BiOWiSH™ GUARD'n SHIELD is applied as a foliar spray. Dilute 2 mls of BiOWiSH™ GUARD'n SHIELD per gallon of water (0.5 mls per liter) or other approved compatible liquid along with 8.5 oz (250 mls) per gallon of a mineral oil and 0.2 oz. (6 mls) per gallon of a spreader/sticker. Apply as a foliar spray either via tractor-drawn fan sprayer or aerial application. Clean all application equipment prior to use.

Product Handling and Storage

- BiOWiSH™ GUARD'n SHIELD is non-toxic, non-flammable and safe for everyday use. Please see product Safety Data Sheet for more information at biowishtechnologies.com/sds.
- **Storage:** Store in a cool, dry location out of direct sunlight. Storage above 40°C (104°F) for extended periods is not recommended. Once opened, reclose container to maintain integrity of the product. Once in solution, dose within 24 hours.
- **Product origin:** Made in USA
